Welcome to SunSibility

We do hope you enjoy looking through your new brochure full of stylish solutions for staying safe in the sun. Our main focus, as always, is our SunSibility clothing, available in 28 colours and in a range of classic designs.

Full length designs always offer the maximum protection, but by request we have focused more on layering so longer options can be worn under or over designs.

Match colours or even contrast them allowing the freedom to mix our collection with your own wardrobe making UV protection easy and completely adaptable.

Whilst every effort has been made to illustrate colours accurately in the brochure, please note that final shades may vary slightly. Swatches are always available on request.

The beachwear is a fun range established for style and simplicity more than for protection so don’t forget your sun cream.

Our SunSibility collection is designed and manufactured in house, all garments are individually made to order right here in the UK. We use specialist Italian fabric that has a built in UV Protection Factor (UPF) 50+.

The fabric offers excellent protection preventing 97.5% of UV rays*. It is easy to wear 80% Polyamide and 20% Elastane material that is breathable, sea water and chlorine resistant, machine washable at 40° and virtually crease-free – a bonus when travelling!

For extreme sensitivity to UV light we can offer designs doubled in fabric to enhance the level of protection but in most cases one layer is more than enough.

The general rule is double the fabric double the price, however, this does of course make the garments heavier to wear and isn’t possible with all styles. Please do discuss this with us before ordering.

Being in the sun protection business for over fifteen years SunSibility have built up expertise and knowledge working with dermatologists, hospital units and being endorsed by the medical profession. We know what customers want and we provide the best possible products. In addition, our range of complimenting products give you the convenience of shopping for all your needs in one place.

Our website is constantly updated with new innovations and award winning products plus exciting ideas which you can view at sunsibility.co.uk. We are committed to helping our customers enjoy the sun safely.

We are thrilled to offer Stingray’s sunsuits & swimwear, Wallaroo headwear, UV umbrellas, window films and highly reputable ranges of specialist skincare. (all dermatologically tested)

We believe in quality solutions and that is what we aim to provide. You are our priority and excellence is what we aim to achieve. If you have any ideas or suggestions, please contact us at info@sunsibility.co.uk we would love to hear from you.

Clothing can take up to 28 days to dispatch due to being individually made. If your order is needed by a particular date, please let us know & we will prioritise for you.

Happy shopping.

Angeli Jackson,
Founder & Product Developer

*The standards AS/NZS 4399: 1996 classifies the degree of protection in terms of UPF (Ultra Violet Protection Factor) 10 minutes x UPF 50 = 500 minutes or approximately 8 HOURS protection against the UV rays.

*SunSibility works very closely with the following organisations and its members to help develop new designs. Lupus UK, The Vitiligo Society, The Albinism Fellowship, XP Support Group, BASC (British Association of Skin Camouflage), The British Red Cross, The British Porphyria Association and The National Eczema Society & many dermatologists and hospital units.

The clothes we have purchased from SunSibility have enabled our daughter and us to enjoy a summer outside.

We had previously tried sun suits from major retailers but she had still burnt through them. We had all but given up hope when we came across SunSibility. We tentatively purchased a long-sleeved turtle neck top not really believing it would work. How wrong we were! The top fully protected her skin and allowed her to play outside as much as she wanted. In the summer, we holidayed in the Scilly Isles, where the UV is typically UV8 or higher. Again, we had no flare-ups whilst wearing SunSibility products.

To be able to allow her to play on the beach and in the sea was such a joy.

We are fortunate and grateful to have found SunSibility and can’t recommend them and their products enough.

www.sunsibility.co.uk - Tel +44 (0)20 8224 2299
The SunSibility clothing range comes up a little larger in cut and size. If customers are between sizes, i.e. 12/14, we would advise the smaller of the two, to get a more fitted look and the larger for a looser fit. Our designs are loosely cut unless stated ‘fitted’ in the product description.

To check your measurements follow these guidelines:

Bust – Place tape measure under your arms around the widest part of your chest. The tape measure should also be placed on top of your shoulder blades. If possible keep your arms at your side and get someone else to measure you.

Waist – You need to measure your natural waistline, not too tight. Your natural waist is found by bending your body sideways.

Hips – Put the measuring tape around the biggest part of your bottom at the top of your legs. Ideally this should be around 20cm/8inches below your waist.

Height – Measure from the top of your head to the ground with no shoes.
An issue in today’s online shopping is customers being able to purchase garments that enable a perfect fit. This is due to the fact the UK has no national sizing guidelines for each retailer to follow, which means each shop will pretty much be able to make up their own size chart. Consequently, you could be a perfect ten in one shop and then hardly be able to breathe in the next!

In the UK, numbers traditionally indicate women’s clothing size. In 1982 the British Standards Institute created an average set of sizes from 8 to 32 produced in centimetres.

On our website we have drawn up some helpful tables to show sizes provided by British Standard as an indicator and we have inserted SunSibility’s sizing so you can compare. If you would like further advice or a copy of this please feel free to call us on 0208 224 2299. We are here to help.

However, if the rate of VAT changes between the date of your order and the date of delivery, we will adjust the VAT you are required to pay accordingly. We will notify you of this change in writing at least 14 days before the date of delivery.
9.4 The price of a product does not include delivery charges. Our delivery charges are quoted on our site from time to time. To check current delivery charges, please refer to our How to Order page at http://www.sunsibility.co.uk/about-sunsibility/how-to-order.
9.5 Our site contains a large number of products. It is always possible that, despite our reasonable efforts, some of the products on our site may be incorrectly priced. If we discover an error in the price of the products you have ordered we will contact you to inform you of this error and we will give you the option of continuing to purchase the product at the correct price or canceling your order. We will not process your order until we have your instructions. If we are unable to contact you regarding the order details you provided during the ordering process, we will treat the order as canceled and notify you in writing. Please note that if the pricing error is obvious and unacceptable and could have reasonably been recognized by you as a mispricing, we do not have to offer the products to you at the incorrect (lower) price.
